

Timber Sculptures for Housing Development Sites

Greenspace Designs Limited create timber sculptures to finish a lawn or hard surfaced communal area. A sculpture adds class to a development, creating something natural and eye catching that lifts the spirit. Choose one of our popular sculptures or ask us to produce something unique for your site, something special in solid, vandal resistant local timber.

Prices

Made using robust locally grown timber from sustainable sources.

If appropriate we can work with the timber that has been felled on your site.

Installation service available or the products can be delivered with installation instructions.

Installation service £600 plus VAT per day plus 45p per mile travel costs.

Delivery via Pallet-line if possible or at £2 per mile plus VAT from EX20 4HX.

Other products and services available, visit our website for further information.

Sculptures made from timber are made from a living material that will crack and split to a minor degree as they settle into a new location. This is a natural process that does not detract from the form or the function of the products.
