

I Spy with WiFiEye

something beginning with . . .

The WiFiEye is a smart, solar powered camera that emails pictures to you as it takes them. A security camera for remote lanes, workshops, stables and access points on your property. Be alerted to intruders, poachers, straying animals, escaping stock, vehicle movements or anything that a motion detecting camera can capture and email to you as it happens.

Technology allows you to keep an eye on every part of your property. This new generation of cameras do not need to be close to mains power or your wifi network.

A WiFiEye camera can be installed anywhere with a mobile phone signal.

- o Second Property
- o Unmanned Toolstore
- o Remote Stable
- o Quiet Access Lane
- o Release Pen
- o Tractor Shed
- o Wildlife Hotspot
- o Elderly Relative's House
- o Distant Pasture

Installing a WiFiEye enables you to act immediately or to alert a neighbour, colleague or the police if something needs investigating.

You can install a number of cameras on a single property, each with a unique name relating to your chosen location.

With the solar powered model you do not need to change the batteries, the camera will continue sending pictures as it is triggered by animal or human activity.

The battery operated camera can be used as a temporary security device and be moved from one location to another around your property.

Send an email to info@wifieye.co.uk to discuss your camera needs or the range of cameras available.

Keep a WiFiEye on the things you care about.
